it was first published in 1882 by the Royal Serbian Academy of Sciences and Arts, Belgrade, and republished in the series Univerzitetski radoslovravnijski Zavod “Kornelije Marjanović, 1883. The reasons for the author's previous contributions to both the lectures on the anatomy and physiology of the human body and the series on the history of the Serbian university (PhD) and his plan for his new work (“Srpska Akademija Nauka i umetnosti”, 2004) may be gathered from the preface. Download e-book for free: The book was first published in 1882 by the Royal Serbian Academy of Sciences and Arts, Belgrade, and republished in the series Univerzitetski radoslovravnijski Zavod “Kornelije Marjanović, 1883. The reasons for the author's previous contributions to both the lectures on the anatomy and physiology of the human body and the series on the history of the Serbian university (PhD) and his plan for his new work (“Srpska Akademija Nauka i umetnosti”, 2004) may be gathered from the

preface. The book is divided into six parts and includes the following chapters: Part I The genesis of the human organism, from pre-human life and the evolution of man, and the organization of the brain, nervous system and special sense organs. Part II The different systems and tissues of the human body, and their functions. Part III The organs of the brain, their nervous control, and their diseases. Part IV The various bodily functions of nutrition, assimilation, excretion, secretion and circulation. Part V The anatomical and physiological characteristics of the different systems of the human body. Part VI The important anthropological and physiological changes which have taken place in the human species. The collection of lectures consists of 18 lectures on the subjects of anatomy and physiology of the human body, as well as on the history of the Serbian university, its research activities and programmes, and its plan for the future. They are organized into five chapters: 1. The organization of the human body; 2. The nervous system, the sensory organs, the brain and the nervous control of the different organs; 3. The functions of the bodily systems and organs; 4. 82157476af
