D.Sc. (Doktor der Sozialwissenschaften), Dr. rer. nat. (Dr. rer. nat.), Dr. phil. nat. (Dr. phil. nat.) education Dr. rer. nat. Dr. rer. nat. Dr. rer. nat. Habilitation is a kind of recognition of a scholar, a scientist who has advanced in their field to a very high level. It is granted in Germany and Austria by higher education institutions in the context of a doctorate. The Habilitation usually follows on from a master degree (but not always), and the master has to be completed before the degree, and the Habilitation is possible only if the student has reached a sufficiently high level in the field covered by their master thesis or other related work. Although a habilitation is usually granted only to specific disciplines, some universities are granting Habilitation to several different fields. In most cases the Habilitation includes teaching obligations. Dr. rer. nat. Dr. rer. nat. is an academic degree that is granted by universities in Germany. The study is lead by the University of Ulm for its Bibliothekreform (Library Reform). The Habilitation is a study method that is working with the existing Higher education system in Germany. It includes three steps: Students of eligible disciplines of the university are required to write a Habilitation in the University of Ulm. The professor of the Habil

The error msg is "Logon failure: unknown user name or bad password" I have tried all the solutions given on the net. But none of them is working with me. Can you suggest any solution for this...?? Is there any possibility of creating an unsecure COM+ application that only accesses restricted resources and returns some data from them?...and someone else can access the same COM+ application and receive this data? I need someone who can analyze the SQL provided by the server. I need to fix small errors like INDEX issues and so on. Do not need someone who can fix the entire code but only do these tasks. Hi, I have a samp that is giving me a error when it is called The error is : The cursor does not contain any column information. What could be the cause of this? SELECT [z].[RecordId] FROM [dbo].[tblExample] z WHERE (((z.[userName] = @0) And (z.[tblExampleId] = @1))); The variable @0 is @[UserName] The variable @1 is #1 (i am not sure what this mean) I am using sql server 2008. I need someone who is familiar with cursors. ...and when exiting that process it raises an exception. By Todd Zolecki / MLB.com | PHILADELPHIA -- Heading into Saturday's game against the Reds at Great American Ball Park, the Phillies will likely need to give Cole Hamels some time to prepare for his next start. Hamels will make his third straight start on Sunday against the Reds after the Phils shut him down Saturday. The Reds won the opener of their series with Hamels giving up four runs on six hits in five innings in Cincinnati. It was the second time this season Hamels gave up four runs or more in a start. Based on Hamels' history, it could be some time before he finds the form from earlier this season. When he did, it was usually in about one or two starts. Last year, he went 12-7. In 2009, he was 9-3. In 2008, he was 12-4. Hamels, in recent starts, has been much better than he was in his first five starts of the season. He was 5-0 with a 1.68 ERA and 38 strikeouts in 38 innings over those first five games. But he also threw five innings and gave up nine hits and five runs in his last start June 1 against the Brewers. He was 4-3 with a 4.85 ERA in eight starts this year. Prior to that start,

Hamels had a 3.30 ERA in the month of May and a 4.06 ERA in
